PROFILE

A highly skilled developer with a deep understanding of computers, I specialize in crafting efficient and stable solutions to complex problems. My approach prioritizes finding the most effective and reliable methods to ensure end products perform seamlessly, only turning to alternative solutions when necessary. With expertise spanning desktop, web, and mobile applications, I deliver robust, scalable results tailored to meet client and user needs. My diverse range of tech stacks highlights my adaptability to any necessary technologies, enabling me to deliver modern solutions in a rapidly evolving technological landscape in the industry.

WORK EXPERIENCE

The Knowledge Group, LLC

Apr 2024 - December 2024

Full-Stack Flutter Developer

- Developed KnowledgeWebcasts an all-in-one platform that lets users explore, stream, and stay updated with insightful webcasts for Lawyers, Doctors, Entrepreneur and Cybersecurity Experts. Featuring powerful tools like search, live notifications, dark mode, and seamless subscription options, the app offers a premium experience for accessing webcast content anytime, anywhere.

QUX Tech. Inc

Oct 2023 - Oct 2024

Front-end ReactJS | NextJS Developer

- Developed Qux.tv is an enterprise platform serving millions of Americans with TV channel subscription services. It also offers livestreaming for independent content creators, a marketplace for merchants to sell merchandise, and its own digital currency, which can be transferred directly to a bank account or digital wallet.

Robot-Hub Limited

Jun 2023 - Jul 2023

Javascript Developer

- Developed a JavaScript-based website that automates the processing of PDF documents for customers, streamlining tax and government document workflows through the use of Robotic Process Automation (RPA), Optical Character Recognition (OCR), scripting, macros, and workflow automation tools.

Rooche

Jun 2023 - Jul 2023

PHP & Flutter Developer

- Contributed to the development of the FlowChat™ Chat Management Platform, enabling content conversion into conversations for social selling using PHP. Additionally, initially designed and documented MilesHealth™, a health tracking application, built with Flutter.
